Election/Restrictions

1. Applicant's election with traverse of the restriction requirement in the reply filed on 10/787307 is acknowledged. The traversal is not explained. This is not found persuasive because no evidence is provided to support the traversal.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 36 and 37 are rejected under 35 U.S.C. 102(a) as being anticipated by Palmaz 2003/0023303.

4. Under the principles of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. When the prior art device is the same as a device described in the specification for carrying out the claimed method, it can be assumed the device will inherently perform the claimed process. In re King, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

5. Palmaz discloses a valve with an orifice relative to the valve support structure and delivery apparatus that is equipped with radiopaque markers para. 0080 in order to
